Director General

**THE FERTILISER ASSOCIATION OF INDIA**

ENSURING FOOD SECURITY

T/32/Workshop

11 April 2025

Dear Sir,

***Subject: Workshop on Sustainable Water Management in Fertiliser Industry,  
28-29 May 2025, YFIPL, Babrala, U.P.***

Fertiliser production is water intensive process. Water is used for process, heating & cooling, steam generation, firefighting, drinking, cleaning, deashing and sanitization. The quantity of water consumed in the fertiliser manufacturing process depends upon the process technology, quality of water and raw material used. Further, large amount of wastewater is also generated, which requires adequate treatment as per the regulation before discharging outside the plant battery limit. The Central Ground Water Authority (CGWA) has restricted withdrawal of groundwater in over-exploited areas and imposed conditions on use of groundwater. Water supply for industrial use is also restricted in some States in case of water scarcity. Water conservation is crucial due to the availability of raw water, regulatory requirements, and the need to enhance productivity. Fertiliser industry has always made concerted efforts to conserve water through reduction in consumption of fresh water and recycle & reuse of wastewater. However, there is a need to disseminate information on the latest developments and measures undertaken by various plants in the area of water management.

In this context, the Fertiliser Association of India is organizing a 2 days' Workshop on "***Sustainable Water Management in Fertiliser Industry***" during 28-29 May 2025. M/s. Yara Fertilisers India Private Limited (YFIPL) has kindly agreed to host the program at Babrala, U.P. The Workshop will discuss the important elements of water audit, technologies to monitor & reduce water consumption, improving quality of raw, DM, BFW & cooling water, developments in wastewater treatment systems, role of digitalization and AI in water management, etc. Emphasis will be laid on knowledge sharing among participants and case studies on water conservation measures adopted by fertiliser industry will also be included. Presentations will be made by experts, senior industry executives and leading vendors. Senior officials from concerned Central & State authorities will be invited to provide insight to the regulatory aspects. A visit to the facilities of YFIPL, Babrala will also be included in the Program.

The stay arrangements have been made at Guest House at Babrala. To defray the cost of boarding and lodging and other administrative expenses, a participation fee will be charged. Due to limited availability of rooms at the Guest House, the maximum participation is restricted to 40 only and the accommodation of participations will be only on sharing basis. The nominations will be accepted on first-cum-first basis and restricted to maximum of 2 participants per location. The fee on double occupancy will be Rs. 12,000/- (Rupees twelve thousand only) per participant plus GST. The fee will cover cost of boarding and lodging for 3 nights and program kit. An instruction sheet is enclosed for further information on the Workshop.

We are sure that you would like to avail this unique opportunity by nominating suitable executives dealing in the area of water management. It is requested that your nomination(s) should reach us latest by **15 May 2025** through email to Mr. Manish Goswami, Chief (Technical), FAI, New Delhi, email: tech@faidelhi.org. The modes of payment are given in the nomination form.

Thanking you,

Yours sincerely,

(S.K. Chaudhari)
