

Vacancy in Technical Division at New Delhi

Fertiliser Association of India is a representative body of fertilizer manufacturers in the country. Its prime objective is to promote efficiency in production, distribution and use of fertilizers. It is engaged in monitoring performance of industry, providing consultancy and advisory services. Technical Division of the Association monitors the performance of fertilizer plants in the areas of energy efficiency, environment, maintenance, safety, product quality, supply and quality of raw materials, etc. Reports and status papers are brought out regularly in all these areas. The Division also provides advisory services to the industry in these and other related areas. The Division also organizes training programmes/workshops/group discussion for the benefit of chemical and mechanical engineers and chemists working in various functional areas of fertilizer plants.

We are looking for a suitable person in New Delhi to assist in the work of Technical Division.

The applicant should hold a graduate degree in chemical or mechanical engineering or M.Sc. in Chemistry / Chemical technology preferably with experience of 1-2 years. However, fresh candidates with good academic record will also be considered. Clarity of thinking, power of expression in English and organizing ability are essential qualities for the job. Proficiency in computer applications (MS Office, internet, email, etc.) is a must.

The compensation includes salary alongwith DA, HRA, CPF, superannuation, gratuity, LTC, medical benefit etc.

Please send your CV through email to:
